

Big Huge Labs Project for ELLs

English Language Learners (ELL)

- **Picture Dictionary:** Have ELL students create a picture dictionary using Big Huge Labs, where they can choose vocabulary words from different categories (e.g., animals, food, emotions) and create visual representations for each word. This project can help enhance vocabulary acquisition and provide a reference tool for future learning.
- **Cultural Collage:** Encourage ELL students to explore their own culture or a target culture they are studying. Have them create a collage using images and captions to showcase cultural elements such as clothing, traditions, celebrations, and landmarks. This project promotes cultural understanding and provides an opportunity for language practice.
- **Vocabulary Posters:** Assign ELL students a set of vocabulary words related to a specific topic (e.g., weather, sports, family) and ask them to create posters using Big Huge Labs. They can choose appropriate images, add labels or captions, and display the posters in the classroom. This project promotes vocabulary development and visual association with words.

English Language Learners (ELL)

- **Biographical Posters:** Assign ELL students to research a famous person or a historical figure. Using Big Huge Labs, they can create biographical posters featuring images, key facts, and captions about the person's life and achievements. This project enhances research skills, language proficiency, and cultural awareness.
- **Measurement Poster:** Assign ELL students specific measurements to explore. Using Big Huge Labs, they can create posters illustrating different objects that exemplify these measurements.
- **Math Flash Cards:** Have ELL students create math flash cards. They can design with numerical expressions, equations, or math facts using the Trading Cards template.
- **Math Poster:** Guide ELL students to choose a math problem or concept and visually depict the math concept using the Motivational Poster template.

Note: These project ideas can be adapted to suit the language proficiency level of the ELL students and can be adjusted to align with their specific language learning goals and classroom curriculum.
