

Big Huge Labs Project Ideas by Content Area

Mathematics

1. **Infographic Poster:** Design an infographic poster illustrating a math concept or formula, with visual representations, examples, and explanations.
2. **Collage:** Create a collage showcasing real-life applications of mathematical concepts, such as geometric shapes in architecture or statistics in sports.
3. **Trading Cards:** Develop trading cards featuring mathematical concepts, equations, and their applications, with visuals and explanations.

Science

1. **Poster:** Create a poster presenting a scientific experiment, including the hypothesis, methods, results, and conclusions, along with relevant images.
2. **Collage:** Design a collage that illustrates different branches of science and their contributions to society, incorporating images and brief descriptions.
3. **Magazine Cover:** Develop a magazine cover featuring a specific scientific topic, highlighting recent discoveries, key scientists, and their impact on the world.

History

1. **Poster:** Create a poster showcasing a historical event or figure and include key facts, images, and a brief description.
2. **Trading Cards:** Design trading cards featuring influential historical figures or key events, with information and visuals on each card.
3. **Magazine Cover:** Create a magazine cover that highlights a significant historical period, including headlines, images, and captions.

English/Language Arts

1. **Poster:** Create a poster displaying literary elements (e.g., plot, characters, themes) of a novel or play, along with relevant quotations and visuals.
2. **Collage:** Design a collage showcasing literary genres, incorporating book covers, images, and brief descriptions of representative works.
3. **Magazine Cover:** Develop a magazine cover featuring an author or a specific literary movement, including headlines, images, and captivating quotes.
