Class Companion offers the power of AI (artificial intelligence) to provide assignments and feedback for written tasks. Import assignments using any of three methods - import a project from your device's documents using copy and paste, create a task from scratch, or use an assignment from Class Companion's library. Choose from the essay or short response format. Class Companion analyzes the text and allows teachers to customize options before assigning them to students; options include a selection of rubrics, questions about the piece, and the number of attempts students have to submit a correct response. Students access Class Companion by the provided link shared from your account. As students complete the activities, Class Companion provides feedback on their responses.

tag(s): [artificial intelligence](#) (89), [assessment](#) (147), [differentiation](#) (83), [feedback](#) (8), [writing](#) (314)

IN THE CLASSROOM

Take advantage of the tutorials provided by Class Companion to learn how to customize lessons and feedback to engage and motivate students. As you become familiar with using the tools found in this resource, learn how to enhance student learning by providing them with options to dispute the AI feedback, which encourages critical thinking skills. Use Class Companion's built-in feedback tools for AP classes to provide low-stakes and unlimited practice for upcoming exams. Use the reporting tools available on the site to share feedback on student growth with individual students to encourage reflective learning practices.

Edge Features:

Requires registration/log-in (WITH email)

Includes teacher tools for registering and/or monitoring students

“

AI is the development of computer programs or systems that can mimic human cognitive functions like understanding language, recognizing patterns, making decisions, and even being creative.

~Claude AI

Examples of Artificial Intelligence

Virtual assistants

Face recognition

Netflix or Amazon suggestions

Self-driving cars

SPAM filters

How to use AI in the Classroom:

Personalized
learning

Virtual tutor

Create and grade
assessments

More AI to Explore

Special Topics

These curated collections offer a palatable listing of resources. There are two collections including: AI Resources for Productivity and AI Resources for Assessment. All reviewed resources include a description and classroom use ideas.

Help! Article

If you are just learning about AI, this is a great place to start. This article provides background information about AI, books related to artificial intelligence, lesson activities, extension ideas, and standards correlations.

All Tagged - AI

Explore our entire collection of nearly 100 AI resources. Each reviewed resource includes a description with pertinent information and classroom use ideas that include lesson stems and how to integrate the tools in your lessons.
